

# Trimming the Town House Andes Mint Holder

All images © 1990-2016 Stampin' Up!®

## Supplies:

- **Card Stock (CS)** – Poppy Parade (119793)
- **Misc.** – Home Together Dies (153515): Trimming the Town Designer Series Paper (DSP) (153491); Clear Wink of Stella (141897); Multipurpose Liquid Glue (110755); Bone Folder (102300); Paper Snips (103579); Paper Trimmer (152392); Simply Scored (122334); Stampin' Cut & Emboss Machine (149653)

## Measurements:

- Poppy Parade CS: 2-5/8" x 2-1/4" and scored 1/2" from all sides; 1/2" x 5"; plus a scrap for die cutting

## Instructions:

1. Burnish all the folds in the Poppy Parade CS.
2. Cut one score line at each corner, as shown in the diagram below.
3. Glue the corner flaps onto the inside of the adjacent sides, to form the base of the holder.
4. Die cut two houses from the DSP, and two, using the same die, from the scrap of Poppy Parade CS.
5. Glue the DSP houses onto the CS houses.
6. Color the windows of both houses with Wink of Stella. (This never shows in photos.)
7. Run a Bone Folder along the length of the CS strip, like you would to curl ribbon, to soften the fibers. This is so it will curve and not bend.
8. Glue one end of the CS strip onto the inside of one shorter sides of the holder base, and the other end onto the inside of the opposite side of the base, to form the handle.
9. Glue one house onto each end of the holder, only applying glue along the bottom, where it meets the base, and a little way up the middle, where it meets the handle.
10. This holds 5 Andes Mints perfectly.

# TREAT HOLDER BASE
